### [6] Education and Research (ED)

#### [6.1] Number of Courses/Subjects Related to Sustainability Offered

##### Total course in the academic year 2021

Semester 1/64	Semester 2/64	Total
1484	1471	2955

##### Total courses related to sustainability in 2021

Semester 1/64	Semester 2/64	Total
37	40	77

##### Examples of Subjects related to sustainability

Course Title	Description
<b>Example of Subjects related to sustainability added in 2021</b>	
Occupational Health and Safety 4101703	Concept, importance, and law relating to safety, occupational health, and working environment; occupational disease and accident, occupational safety, management of occupational health and safety in the workplace, and physical examination based on occupational risk factor
Human and Environment 2000115	Natural resources and environments, ecosystems, biodiversity, food security, natural disaster, environmental crisis, human development process for resources and environmental management for sustainable locality development
Community Natural Resources and Environment Management 2533464	Definitions, concepts and theories, principles, importance and impacts, analysis and selection of community natural resources and environment management
Science and Technology Development in the Changing World 4000127	Effects of science and technology on global changes, development of community and country, energy and global warming, natural resources, environment, disaster, agriculture, and agricultural industry
Earth Science 4012101	Major element of earth science, lithosphere, hydrosphere, biosphere, atmosphere, relationship of earth system, process of changing within earth and on surface of earth, geological disaster, rock hierarchy, mineral resources, map and utilization, earth's energy balance, air circulation, circulation of water in ocean, formation of cloud, global climate change, process of changing weather, climate and global climate change, weather forecast and practice

Course Title	Description
<b>Example of Subjects related to sustainability added in 2021</b>	
Physics of Energy 4012102	Meaning and type of energy, current condition, potential and problem in energy; solar energy, nuclear energy, wind energy, geothermal energy, hydro energy, fossil energy, biomass energy, electrical energy, alternative energy, energy conservation and energy efficiency
Environment Community and Local Wisdom for Learning Management in Elementary Education 1193002	Search and analyze systematic information from research, learning resources, local wisdom, surrounding, lifestyle, history of community and local to connect learning management and learner development, learning unit design, and learning management by cooperation with the community by various methods to enhance and learning solve problem and learner
<b>Example of Science and Technology Course related to Sustainability Offered</b>	
Ecology 4033101	Basic principles of ecology, ecological system, energy, limiting factors, the cycle of substances, population, community, succession, distribution, pollution, natural resource and environmental management, and application of ecological theory to prevent and solve environmental problems, and practice
Environmental Science 4061101	Basic principles of environmental science, ecological system, natural resources, conservation and sustainable resource management; pollution; impact, prevention and treatment of pollution; environmental management, global environmental situations, and practice
Oceanography 4052103	The geological structure of the sea and ocean, physical and chemical properties of substances of seawater, the living substance in the ocean, oceanography, ecology, natural resources in the ocean, and practice basic principles of environmental science, ecological system, natural resources, conservation and sustainable resource management; pollutions; impact, prevention and treatment of pollutions; environmental management, global environmental situations, and practice
Environmental Health 4103708	Fundamentals of Environmental Health Sanitation of drinking water, used water, food sanitation, Sewage Treatment and Disposal, wastewater treatment, Solid waste and hazardous waste management, Animal and pest control and prevention, Air Pollution Management and Control nuisance control, community and local environmental health management and planning
National and International Standards on Occupational Health Safety and Environmental Management 4104402	Principle's quality management and international standards occupational health safety and environment management in Thailand and abroad, international standards for quality management (ISO 9001), international standard environmental management (ISO 14000), standards for occupational health and safety (BS 8800) TIS. 18001 standard, labour, national and international (TIS 18000), and International Labor Organization (ILO)
Modern Science in Biology 4032101	Modern technology in biology, research in biology, the effect of science and technology on global change, development of community and country, natural resources, environment, disaster, agriculture and agricultural industry

**Description:**

Above are examples of the courses that have had changes approved through NPRU's Curriculum Refresh program, which aims to embed sustainability into all courses and module content offered by the

University. The list also includes courses with sustainability already embedded. The total number of courses with sustainability embedded for courses running from 2019 to 2021 is 77 (adding 29 out of 48 courses from 2020). The entire courses are 2,955, and the sustainability courses are 77, which is about 2.60 % of all courses.
